

Wire binding perforation with thumb hole up to 550mm width !

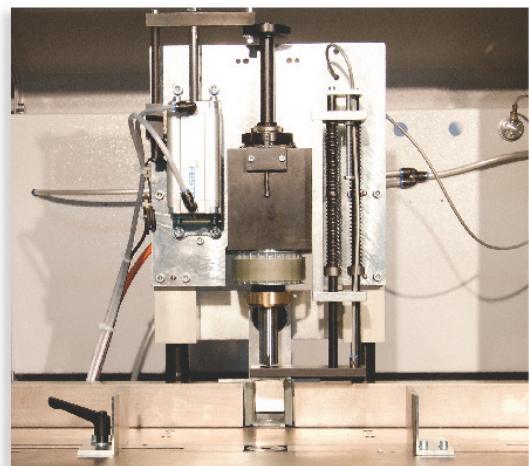

on Dürselen PB.16 D and PB.18

Collected products up to 50mm height consisting of different materials as well as folded sheets, tab sheets etc. are drilled economically in perfect quality.

Sticking together, chipping of paint and damages to sensitive material by gripper are excluded.

In addition to the drilling patterns for wire comb binding almost all hole patterns for file hole or ring binders, for a combination of US and EU pattern, as well as Filofax are stored in the computer.
